

SCIENCE EDUCATION

# K-12 Catalog

2025

Thank you, from our hearts to yours.

You've shared a passion with us for inspiring students and furthering their interest in STEM careers, and for this we are so grateful.

### **Vernier Volunteers**

As a company, we volunteer for organizations such as Habitat for Humanity, The Humane Society, Oregon Museum of Science & Industry, Portland Symphony, Oregon Public Broadcasting, LEGO® Robotic Tournaments, Meals-on-Wheels, The Nature Conservancy, Oregon Food Bank, and many other organizations.

Vernier employees are encouraged to volunteer for non-profit organizations of their choice on company time and receive four hours of pay each month for their volunteer time. Vernier employees regularly volunteer at schools—teaching children to read, teaching art literacy, and helping with field trips and other school functions.

# Welcome!

Dear Educators and Partners,

What a warm welcome I have received this year! I'm so thrilled to join the mission that Dave and Christine created at Vernier and to work alongside educators who are at the heart of everything we do. My decision to join Vernier as CEO was deeply personal—shaped by my father's career as a teacher and administrator—and grounded in a shared commitment to advancing science education through hands-on learning and tools that make STEM accessible and engaging for all students.

At Vernier, we know that STEM education is transformative. Our solutions are not just designed for data collection but to empower students to become active participants in their learning. When students can observe real-world phenomena, ask questions, conduct investigations, and analyze data, they move beyond what's possible from only reading or watching to gain a deeper understanding of science. This experiential approach helps students build critical thinking skills and fosters a resilient mindset that will serve them in any path they choose, from continuing in higher education to entering the workforce.

Vernier data-collection tools transform a classroom from a place where science is talked about to a place where it is actively experienced. Through real-time data collection and analysis, students begin to form critical connections and see firsthand how science shapes the world around them. This is where the inspiration happens—where science becomes personal, exciting, and meaningful. Our goal is for students to see themselves as real scientists and problem solvers, gaining confidence to navigate our rapidly changing world with knowledge, curiosity, and skill.

For me, the chance to support educators and create these moments of inspiration for students is a privilege and a passion. I am excited to continue the Vernier legacy of excellence and to work alongside all of you as we inspire the next generation of thinkers, explorers, and problem solvers. Together, let's make science accessible, engaging, and empowering for every student.

Warm regards,

Jill Hedrick, CEO

# About Vernier Science Education

Vernier Science Education® was co-founded in 1981 by Dave and Christine Vernier. The company is now owned by a Perpetual Purpose Trust, which empowers Vernier to stay committed to our core mission and values far into the future.

Vernier is proud to be recognized for its philanthropic commitment, environmental policies, steady growth, and as one of the Best 100 Companies to Work For in Oregon for more than 25 years.

2024 Best Companies to Work For in Oregon

2024 Healthiest Employers of Oregon

10 Tips for Writing Your Best Grant Proposal

We understand that grants are essential for obtaining the supplies, tools, and resources necessary to address the many needs of your students.

This year, with school budgets in such a precarious place, securing grant funding means you and your students can have the support needed to thrive, no matter where learning takes place.

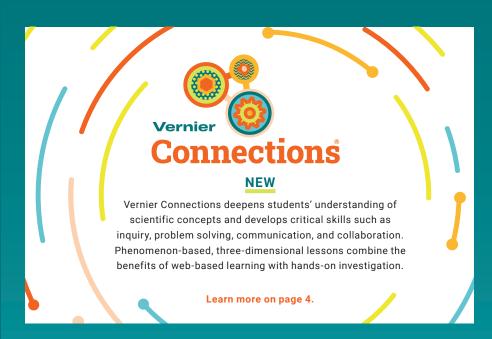

We have created an infographic with 10 tips for grant writing to help you perfect your proposal with newfound confidence.

In addition, discover tips and opportunities for funding your K-12 STEM projects in our updated grant-writing guide. This comprehensive resource includes best practices for writing a successful grant proposal, as well as over 100 upcoming national and state-specific funding opportunities.

# Inspiring future generations of STEM-literate citizens

Web-based, interactive lessons designed to put hands-on investigation at the heart of students' learning

Vernier Connections deepens students' understanding of scientific concepts and develops critical STEM skills such as inquiry, problem solving, communication, and collaboration. The phenomenon-based lessons in Connections can be used to facilitate independent and cooperative learning or integrated into whole-class instruction. Formative assessment tasks focus on student reasoning and are designed to provide evidence of mastery of the three-dimensional elements.

3D learning designed for the NGSS

**TEKS** 

Aligned to the TEKS

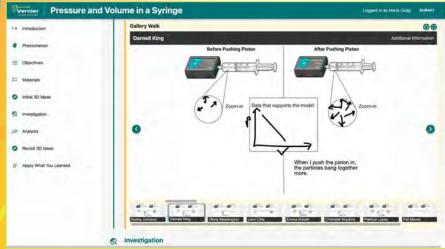

Delivers
relevant & accessible
content

Integrates with your LMS

Connections lessons keep students engaged as they progress through an inquiry cycle. Students are empowered to explore observable phenomena and their causes, develop explanations, and draw connections to their everyday lives.

#### Key features include

A content library that can be filtered by standard, topic, completion time, Vernier sensor, keyword, and more to quickly find the right lesson

Hands-on investigations that leverage Vernier sensors to develop students' skills in collecting and analyzing experimental data

Formative assessment with automated feedback integrated throughout the lesson so students can monitor and adjust their own learning

**Real-time progress monitoring tools** that make it easy for teachers to quickly identify students in need of support and topics in need of review

Time-saving automated grading and one-click grade passback to the LMS

Coming 2025 vernier.com/connections

# Getting Started

# A Guide to Vernier Data Collection

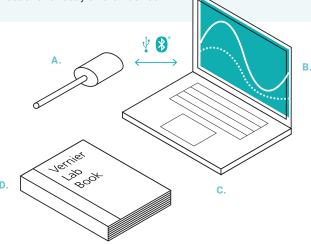

Our data-collection technology helps students record and analyze data from real-world phenomena and make critical connections with concepts and practices that support the development of scientific and critical thinking skills as well as real-world applications of science. Get to know our range of STEM solutions designed to inspire scientific curiosity and support student success.

vernier.com/getting-started

## Why Choose Go Direct Sensors?

Go Direct® sensors are an ideal fit for schools with one-to-one computing solutions. These sensors can connect to any Bluetooth® wireless technology-enabled device—like laptops, Chromebooks, or tablets—or connect via a wired USB connection. The flexible, wireless connection makes it easy for students to log and analyze data in Vernier Graphical Analysis® or Vernier Connections® directly on their device.

#### What You Need to Get Started

#### A. Go Direct Sensor

These versatile sensors connect to your device via Bluetooth wireless technology or USB.

#### B. Vernier Graphical Analysis Pro

With Vernier Graphical Analysis Pro, students can collect, graph, analyze, and share scientific data collected from Vernier sensors.

Learn more at vernier.com/graphical-analysis

#### **Vernier Connections**

Connections' phenomenon-based lessons can be used to facilitate independent and cooperative learning or be integrated into whole-class instruction.

vernier.com/connections

#### C. Device

Go Direct sensors connect to a wide variety of devices commonly used in classrooms, including Chromebooks, computers, compatible mobile devices, and LabQuest® 3.

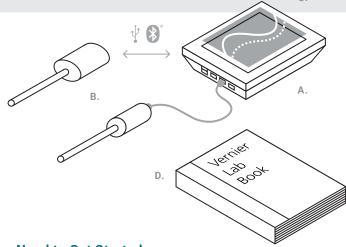

#### D. Lab Book

Step-by-step instructions at your fingertips save valuable time when integrating probeware into your curriculum. Many of our lab books provide support for Go Direct sensors and the Graphical Analysis app.

Our lab books come with a generous site license. Purchase once and share files school wide.

## Why Choose LabQuest 3?

LabQuest 3 is an ideal solution for schools looking to provide students with an easy-to-use data-logging device. The built-in data-collection and analysis app works with all Vernier sensors, including LabQuest and Go Direct sensors. And as a standalone device, it minimizes on-screen distractions while still allowing students to share data in real-time with other devices for collaborative learning.

#### What You Need to Get Started

#### A. LabQuest 3

With its large, high-resolution screen, LabQuest can be easily navigated using gestures. It also offers fast data collection, wireless connectivity with Wi-Fi and Bluetooth wireless technology, and a rechargeable, high-capacity battery.

#### B. Sensors

Compatible with all Vernier sensors, LabQuest 3 connects wirelessly with the family of Go Direct sensors and connects easily to our wired LabQuest sensors.

#### C. Software

LabQuest 3 has built-in software, LabQuest App, that gives your students real-time graphing and analysis capabilities in one handheld device. LabQuest 3 also offers built-in apps, such as a Periodic Table, Sound Recorder, and more, and includes student instructions for over 75 of our most popular experiments.

#### D. Lab Book

Looking for even more lab ideas? Our popular, award-winning lab books provide hundreds of well-tested, customizable experiments.

Our lab books come with a generous site license. Purchase once and share files school wide.

LEARN MORE ABOUT LABQUEST 3 ON PAGE 12.

# Vernier Graphical Analysis Pro

# Deepen students' understanding of natural phenomena through meaningful interaction with data.

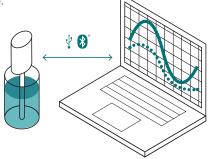

With the Vernier Graphical Analysis® app, students can visualize and interact with experiment data collected using nearly any Vernier sensor. Unlock key features with Graphical Analysis Pro and do more with your Vernier sensors to deepen and extend learning. With access to Pro, you can enrich live instruction while providing more opportunities for students to interact with and analyze data outside of class time.

#### Unlock Pro Access

A subscription site license to Graphical Analysis Pro provides all students and educators at your K-12 school with unlimited access to our award-winning app. 1-Year Site License (unlimited seats) GAP-1YR \$149

3-Year Site License (unlimited seats) GAP-3YR \$299

5-Year Site License (unlimited seats) GAP-5YR \$499

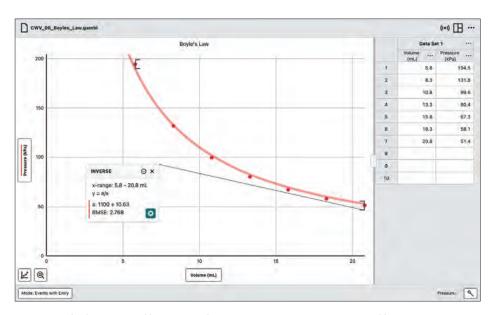

#### **NEW**

#### 4-in-1 Bundle

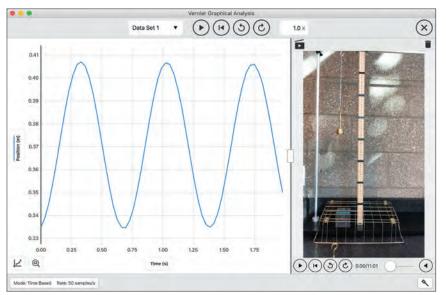

Get all the apps you need to make hands-on data collection easy and engaging for your students! Our new 4-in-1 bundle gives you a 3-year subscription to Vernier Graphical Analysis Pro, Vernier Video Analysis,® Vernier Spectral Analysis, and Vernier Instrumental Analysis.®

DCA-3YR \$499

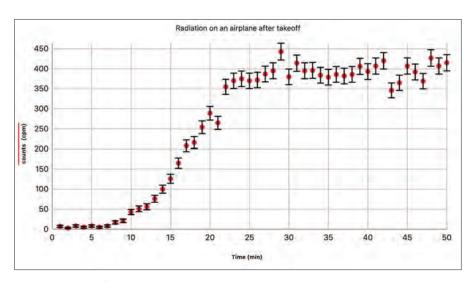

vernier.com/dca-3yr

Collected sensor data is synchronized with the video, allowing students to replay, speed up, slow down, and pause recorded experiments at key moments

Use advanced analysis features, such as error bars, to describe measurement uncertainty.

"The data-sharing feature is outstanding. The engagement is so much better when doing demo labs."

John Kunishima
 Robert O. Townsend Junior High
 Chino Hills, CA

**Awards** 

#### **FREE 30-DAY TRIAL**

Get a 30-day free trial and learn about site license options and e-books at **vernier.com/gapro** 

## **Key Features**

With the free Graphical Analysis app, students can visualize and interact with experiment data collected using nearly any Vernier sensor.

#### **Graphical Analysis Pro Features That Teachers Love**

**Live data sharing** during demonstrations—great for in-person and remote learning

**More graph types**, including bar, histogram, and FFTs, plus the ability to plot categorical items

**Video-sensor data sync**, which enables students to replay, speed up, slow down, and pause recorded experiments at key moments in time

**Library of over 45 sample experiments** ready to be analyzed by students as prep work, homework, or a makeup assignment

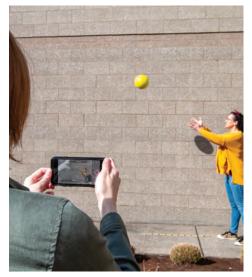

**Graph annotations** so students can demonstrate their comprehension of the graph—and the underlying scientific concepts

**Custom curve fits** that enable students to fit a function of their choosing to experimental data

For more information, go to vernier.com/graphical-analysis

# Vernier Video Analysis

Investigate projectile motion.

# 5 11 ... 1.089 0.554 3.434 0.349 0.804 14 (5)(6) 4 1.545 **WORKS ON CHROMEBOOKS!**

# Study Motion Everywhere

Vernier Video Analysis® helps students make connections between the classroom and the real world. With this streamlined app, students can use videos they find or record their own with mobile devices to measure motion of objects that they can't measure with a sensor.

1-Year Site License (unlimited seats) VVA-1YR \$225

3-Year Site License (unlimited seats) VVA-3YR \$450

#### **Features**

- · Vernier Video Analysis app is compatible with multiple browsers and platforms: ChromeOS,™ Windows,® macOS,® iOS, iPadOS,® and Android.™
- · Students can use prepared videos, found videos, or their own videos for analysis.
- · The app makes it possible to do experiments that cannot be done with sensors, such as analyzing the motion of a basketball in flight-objects can be tracked automatically by the app.
- · Analysis is easy with multiple graphing options, so students are able to think critically about the collected data-they can even analyze the motion of multiple objects in a single video.
- With this app, you can apply vectors and vector components over the video after tracking a moving object, illuminating changes in position, velocity, and acceleration.
- · When multiple objects have been marked, just enter their masses and the app can automatically calculate and display the center of mass location.
- · Annual site-licensing makes purchasing and renewing quick and easy.

#### **FREE 30-DAY TRIAL**

Get a 30-day free trial and learn about site license options and e-books at vernier.com/video-analysis

#### **Vernier Video Analysis: Motion and Sports**

Vernier Video Analysis: Motion and Sports features 12 investigations using Vernier Video Analysis. In addition to traditional physics concepts such as velocity and acceleration, its investigation of sports activities expands learning opportunities and further connects the study of motion to students' daily lives.

Download only HSB-VVAMS-E \$29

#### **Vernier Video Analysis: Conservation Laws and Forces**

This e-book features 12 investigations dealing with topics such as conservation of energy and momentum using the Vernier Video Analysis app.

Download only HSB-VVACLF-E \$29

# **Vernier Spectral Analysis**

# Collect, Share, and Analyze Spectrometer Data

Our free Vernier Spectral Analysis® app makes it easy to incorporate spectroscopy into your biology, chemistry, and physics experiments. Using the app, students can collect a full spectrum and explore topics such as Beer's law, enzyme kinetics, and plant pigments.

Compatible with ChromeOS, Windows, macOS, iOS, iPadOS, and Android.

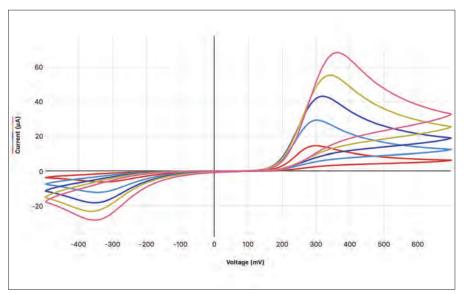

#### **Features**

- Follow on-screen instructions for simplified Beer's law or kinetics data collection.
- Collect full absorbance spectrum or percent transmittance data in less than one second.
- Analyze data with built-in analysis tools, including data interpolation and curve fits.

- Determine the order of kinetics reaction with the calculated columns function.
- Understand color transmission using the color strip shown on full spectrum graphs.
- View a full spectrum of your sample while collecting data for Beer's law or kinetics experiments.
- View spectral lines by collecting intensity vs. wavelength data.

# Vernier Instrumental Analysis

# Incorporate Instrumentation into Your Curriculum

Our free Vernier Instrumental Analysis® app makes it easy to incorporate instrumentation into your chemistry curriculum. With this app, students can collect and analyze data from Mini GC, Mini GC Plus, Go Direct Mini GC,™ Go Direct Cyclic Voltammetry System, and Go Direct Polarimeter using computers, Chromebooks, or other mobile devices.

Compatible with ChromeOS, Windows, macOS, iOS, iPadOS, and Android.

#### **Features**

- · Perform peak integration.
- Split peaks present in your gas chromatograms.
- · Determine peak retention time and area.
- Directly measure the optical rotation value of a sample in your polarimeter at a single point or over time.
- Capture and analyze polarimetry data to identify optically active compounds.
- Analyze, save, and export gas chromatography, voltammetry, and polarimetry data.
- Explore electrochemistry and redox reactions with voltammograms.

# LabQuest 3

# LabQuest 3 is a powerful, easy-to-navigate, and versatile data-logging solution for STEM students.

LabQuest® 3 reimagines data collection by providing students with an innovative, easy-to-use interface. A larger screen and advanced touch screen abilities make it easier for students to collect, graph, and analyze data wherever they are—in the classroom or in the field. Challenge your students to gain a deeper understanding of science through data with the accessible, groundbreaking LabQuest 3.

- · Connects wirelessly to the family of Go Direct® sensors
- · Easy-to-use platform enables students to generate graphs and analyze results
- · An excellent choice for laboratories, classrooms, or in-the-field investigations

LABQ3 \$399

LabQuest 3 purchase includes LabQuest 3 unit, rechargeable battery (in unit), AC power adapter, micro USB computer connection cable, and Quick-Start Guide

### Full-Featured Data-Collection Platform

The most engaging and effective approach to science is interactive, with students collecting and analyzing data to understand and apply core concepts. Graphing and analyzing data is an essential component of the inquiry and learning process. LabQuest 3, with its built-in data-collection and analysis app that works with all Vernier sensors, supports hands-on data collection in the classroom. in the lab. and in the field.

- No laptops, Chromebooks, or tablets? No problem. LabQuest 3 can do it all—data collection, data analysis, and data sharing—no other device is needed.
- Keep your expensive computers safe from spills, drops, and crashes—use LabQuest 3 in the chemistry lab, at the watershed, or next to your bridge tester.
- · With a portable design, your students take it anywhere they go.
- LabOuest 3 works with both Go Direct and wired LabOuest sensors.

# Connectivity to Other Platforms

#### **USB Sensor Interface**

If you want to use your own computer or Chromebook™ to collect data, use LabQuest 3 as a conduit between our wired LabQuest sensors and your device. LabQuest 3 works as a USB sensor interface with Vernier Graphical Analysis.®

#### **One-to-Many Data Sharing**

Students can share real-time data with multiple devices for a truly hands-on, collaborative learning experience. Use LabQuest 3 to transfer data wirelessly to computers, and mobile devices running Vernier Graphical Analysis:

Data Sharing from a LabQuest 3 can also be used to connect wired LabQuest sensors to mobile devices that don't support a USB interface.

\*Data Sharing from LabQuest 3 is not supported in the Progressive Web App version of Vernier Graphical Analysis®

Learn more at vernier.com/labg3

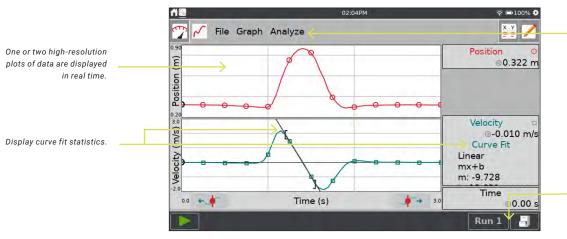

# LabQuest App

LabQuest 3 has built-in software that gives your students real-time graphing capabilities in a handheld device. It's powerful, yet beautifully simple.

- Collect data and view in a Data Table, Meter, and Graph.
- · Perform curve fits.
- · Use built-in sensors-GPS and Microphone.
- · Draw a prediction before collecting data.
- · Display two graphs at once.

- Display a tangent line or use the Integral function tool.
- · Calculate statistics for your data.

Learn more about built-in applications and other great features at <a href="vernier.com/labq3">vernier.com/labq3</a>

Curve fits and other analysis tools are available.

Easily store and recall multiple runs.

#### **One-Touch Simplicity**

Your students can collect data and view them in a Meter, Graph, or Data Table.

**HIGH SCHOOL** 

# Environmental Science

Help your students see that the environmental science concepts discussed in the classroom have serious implications on the world around them. Our hands-on investigations and data-collection technology help students form a better understanding of phenomena.

vernier.com/environmental-science

# **Professional Development**

We are here to help. Our webinars, workshops, and personalized training options offer innovative ways to engage students with STEM in a traditional classroom or virtual environment.

vernier.com/training

# Go Direct Soil Moisture

This sensor uses capacitance to measure the volumetric water content of soil.

GDX-SM \$149

# Go Direct Optical Dissolved Oxygen

This optical sensor makes it easy to measure dissolved oxygen in water, atmospheric pressure, and water temperature.

GDX-0D0 \$385

vernier.com/gdx-odo

# Go Direct Salinity

Go Direct® Salinity precisely measures the total dissolved salt content of ocean or brackish water.

GDX-SAL \$180

vernier.com/gdx-sal

# Go Direct Tris-Compatible Flat pH

The flat glass, double-junction design makes this sensor a good choice for environmental science.

GDX-FPH \$139

vernier.com/gdx-fph

# Go Direct Conductivity

Go Direct Conductivity determines the ionic content of an aqueous solution by measuring its electrical conductivity.

GDX-CON \$129

vernier.com/gdx-con

# Go Direct Surface Temperature

This sensor has an exposed thermistor that results in an extremely rapid response time, making it perfect for use in air and water.

GDX-ST \$99

vernier.com/gdx-st

# Go Direct Light and Color

Measure light intensity in the visible-to-ultraviolet electromagnetic spectrum. An RGB color sensor detects relative contributions of primary colors in light.

GDX-LC \$99

vernier.com/gdx-lc

# Go Direct Weather System

Easily monitor a wide variety of environmental factors with just one sensor. Go Direct Weather System includes an affordable, wireless handheld sensor used to measure ambient temperature, humidity, wind speed, and more. The included Go Direct Weather Vane accessory is required to report wind direction.

GDX-WTVA (sensor and vane) \$164

vernier.com/gdx-wtva

# Strengthen students' critical thinking skills by introducing them to alternative energy solutions to real-world problems.

The KidWind Project and Vernier have teamed up to provide the technology, resources, and support you need for your students to investigate renewable energy.

- Engage your students as they watch power output and energy production data develop in real time.
- Inspire creativity as your students build and test prototypes, test solutions to engineering problems, and optimize designs.
- Measure voltage and current, and calculate power, without using a multimeter.
- Set up activities quickly and easily, creating more time for instruction and exploration.

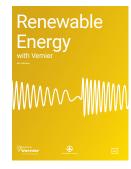

# Renewable Energy with Vernier

The Renewable Energy with Vernier lab book features 26 experiments in wind and solar energy. The book contains a combination of explorations, classic experiments, inquiry investigations, engineering projects, and more.

vernier.com/rev

Printed book + download REV \$59 Download only

REV-E \$45

# Solar Energy Exploration Kit

Explore solar energy with this innovative science kit designed to help students investigate energy transformations. Experiment with basic circuits and learn about important factors in photovoltaic systems.

KW-SEEK \$89

vernier.com/kw-seek

# KidWind Advanced Wind Experiment Kit

Discover advanced concepts of wind turbine technology, including gearboxes and generator construction (with the optional KidWind simpleGEN). Students use the blades they design to generate electricity, lift weights, and pump water. This kit is recommended for use with our *Renewable Energy with Vernier* lab book.

# KidWind Blade Design Consumables

Bulk balsa, chipboard sheets, and dowels for blade making in the classroom. Pack includes 100 balsa sheets, 150 chipboard sheets, and 250 dowels.

KW-BDC \$169

vernier.com/kw-bdc

# Go Direct Energy

This sensor quantifies the voltage, current, power, and energy output of small wind turbines and solar panels, such as those used in our KidWind Experiment Kits.

GDX-NRG \$99

vernier.com/gdx-nrg

### LabQuest 3

LabQuest 3 is a powerful, easy-to-navigate, and versatile data-logging system.

LabQuest® 3 can serve as a standalone data-collection platform that works with all of our sensors. This makes it an excellent choice for teachers and students in the classroom as well as in the field.

LABQ3 \$399

vernier.com/labq3

# Go Direct Sensor Clamp

The Go Direct® Sensor Clamp securely fastens to a wand-style Go Direct sensor, and the included lanyard works as a strap to prevent accidental drops during investigations in the field. Sensors are sold separately.

GDX-CLAMP \$14

vernier.com/gdx-clamp

# Environmental Science Go Direct Starter Package This package includes four sensors that work with Vernier Graphical Analysis® Pro and LabQuest 3.

· Go Direct Temperature

- · Go Direct Tris-Compatible Flat pH
- · Go Direct Conductivity
- · Go Direct Optical Dissolved Oxygen

GDP-EV-ST \$732

Learn more at vernier.com/gdp-ev-st

# Investigating Environmental Science through Inquiry

The Investigating Environmental Science through Inquiry lab book contains 34 inquiry-based environmental science investigations.

Topics include

- Earth systems and resources (air, water, and soil)
- The living world
- Global change and population
- · Energy resources and consumption
- Pollution

**HIGH SCHOOL** 

# Chemistry

Vernier chemistry resources cover an array of key concepts to help prepare your students for what lies ahead. From gas laws to spectroscopy, our products are backed by an extensive collection of experiments and unparalleled technical support.

vernier.com/chemistry

# **Professional Development**

We are here to help. Our webinars, workshops, and personalized training options offer innovative ways to engage students with STEM in a traditional classroom or virtual environment.

vernier.com/training

MOST POPULAR

Students can use this rugged, general-purpose sensor to monitor temperature.

Range: -40 to 125°C

GDX-TMP \$79

vernier.com/gdx-tmp

#### **Go Direct Temperature Teacher Pack**

GDX-TMP-TP \$702

Includes 8 Go Direct® Temperature Probes and a Go Direct Charge Station.

# Go Direct pH

Conduct acid-base titrations, monitor pH changes during chemical reactions, and investigate household acids and bases. The wireless connection makes it easier to do field-based studies such as testing the pH of surface water.

GDX-PH \$109

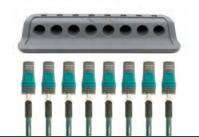

vernier.com/gdx-ph

#### **Go Direct pH Teacher Pack**

GDX-PH-TP \$935

Save money when you purchase the Go Direct pH Teacher Pack, which includes 8 Go Direct pH Sensors and a Go Direct Charge Station.

#### Go Direct Gas Pressure

Explore pressure changes and gas laws with this sensor that measures the absolute pressure of a gas.

GDX-GP \$105

vernier.com/gdx-gp

#### **Go Direct Conductivity**

Go Direct Conductivity determines the ionic content of an aqueous solution by measuring its electrical conductivity. It features a built-in temperature sensor to simultaneously read conductivity and temperature.

GDX-CON \$129

vernier.com/gdx-con

#### Go Direct Colorimeter

Explore absorbance and percent transmittance in a variety of experiments including Beer's law (absorbance vs. concentration) and kinetic studies (concentration vs. time). Students select between four wavelengths (430 nm, 470 nm, 565 nm, 635 nm) to set up their experiment.

GDX-COL \$135

vernier.com/gdx-col

#### Go Direct ORP

Determine the equivalence point of an oxidation-reduction titration or the oxidizing ability of chlorine in swimming pools. This sensor measures the capacity of a solution to either release or accept electrons from chemical reactions.

GDX-ORP \$119

vernier.com/gdx-orp

#### Go Direct Constant Current System

Determine Avogadro's number and perform various electroplating and electrolysis experiments. This system combines a DC power source with a built-in current sensor to eliminate the need for a separate power supply. It can deliver up to 0.6 A at 5 V DC.

GDX-CCS \$95

vernier.com/gdx-ccs

#### Go Direct CO<sub>2</sub> Gas

Measure the carbon dioxide levels in beverages and food products with Go Direct CO<sub>2</sub>. Investigate the chemical makeup of baking soda, explore what makes soft drinks fizzy, or determine the rate of fermentation by yeast while metabolizing different sugars.

GDX-C02 \$229

vernier.com/gdx-co2

#### **NEW** Accessories for an Eco-Friendly Lab

Three new products are now a part of the Vernier high school chemistry lineup, offering reliable, easy-to-use solutions that enhance the lab experience for students and educators. These accessories can be used alongside Vernier Go Direct® sensors to provide impactful learning experiences that are both efficient and environmentally conscious.

#### **Electrochemistry Half-Cell Plate**

The Electrochemistry Half-Cell Plate is a reusable, low-volume platform that holds up to eight metal-ion half-cells, each accessing the central salt bridge. When paired with the Electrochemistry Metals Kit and Go Direct Voltage Probe, it ensures precise, consistent exploration of oxidation-reduction reactions, the electrochemical series, and Nernst variables, while simplifying the setup and cleanup of electrochemical experiments.

ECHEM-PLT \$59

vernier.com/echem-plt

#### **Electrochemistry Metals Kit**

The Electrochemistry Metals Kit provides a convenient, reusable set of seven different metal samples for conducting electrochemical experiments (aluminum, copper, iron, lead, nickel, silver, and zinc). When paired with a half-cell plate and voltage probe, this convenient kit simplifies the study of oxidation, reduction, the electrochemical series, and Nernst variables.

ECHEM-MTLS ☆ \$20

vernier.com/echem-mtls

# Electrochemistry Metals Kit ECHEM-MTLS \$ \$20 Go Direct Voltage GDX-VOLT \$95 Electrochemistry Half-Cell Plate ECHEM-PLT \$59

#### **Precision Volume Dispenser**

The Precision Volume Dispenser gives students and educators a precise, rugged, and easy-to-use alternative to a burette. It can be used with the Go Direct Drop Counter, Go Direct pH Sensor, Go Direct Conductivity Probe, and Go Direct Oxidation-Reduction Potential (ORP) Sensor to conduct acid-base, conductometric, or potentiometric titrations.

DC-DISP \$85

vernier.com/dc-disp

# Forensic Chemistry Experiments

This book includes 15 phenomena-based, 3D-aligned experiments that engage high-school and college-level chemistry students in forensics cases, from identifying a mystery powder to solving a fictional murder. Students explore core chemistry concepts using Vernier sensors such as pH, pressure, conductivity, and temperature.

Printed book + download

HSB-FCHEM \$45

Download only
HSB-FCHEM-E \$35

vernier.com/hsb-fchem

# Food Chemistry Experiments

This book includes 14 phenomena-based experiments that use Vernier sensors such as spectrophotometers, temperature probes, and CO<sub>2</sub> gas sensors to explore key chemistry concepts centered around food—from analyzing carotenoids in vegetables to measuring iron in cereal.

Printed book + download

HSB-FCHEM \$45

GDX-SVISPL \$479

vernier.com/gdx-svispl

Our innovative, easy-to-use instruments collect data within seconds. Explore our full suite of spectrometers at vernier.com/spectrometers

#### Vernier Spectral Analysis App

Our free Vernier Spectral
Analysis® app makes it easy to
incorporate spectroscopy into
your chemistry experiments.
Using the app, students
can collect a full spectrum
and explore topics such as
Beer's law, kinetics, and
fluorescence.

This user-friendly software includes analysis features such as curve fitting and data interpolation.

# Physical Science

From matter and energy to motion and forces, Vernier offers the support you need and the technology your students can use to investigate physical science.

vernier.com/physical-science

#### **Professional Development**

We are here to help. Our webinars, workshops, and personalized training options offer innovative ways to engage students with STEM in a traditional classroom or virtual environment.

vernier.com/training

#### Go Direct Sensor Carts

With our Go Direct® Sensor Carts, students can explore force, position, velocity, and acceleration directly on their devices via Bluetooth® wireless technology—no wires or additional equipment required. Each cart features built-in sensors to simplify experiment setup.

Go Direct Sensor Cart (Green)

#### Go Direct Temperature

MOST POPULAR

Students can use this rugged, general-purpose sensor to monitor temperature.

Range: -40 to 125°C

GDX-TMP \$79

vernier.com/gdx-tmp

#### **Go Direct Temperature Teacher Pack**

GDX-TMP-TP \$702

Includes 8 Go Direct Temperature Probes and a Go Direct Charge Station.

#### Go Direct Light and Color

Students use this sensor to measure the brightness of a light bulb or the reflectance of light from various objects. They can also measure UV light and relative amounts of red, blue, and green light.

GDX-LC \$99

vernier.com/gdx-lc

#### **Go Direct** Force and Acceleration

Students use this sensor to measure forces of up to 50 N. The included 3-axis accelerometer makes it a versatile sensor for many topics in physical science.

GDX-FOR \$119

vernier.com/gdx-for

#### Go Direct pH

Go Direct pH is a general-purpose pH sensor used to monitor pH of aqueous solutions.

GDX-PH \$109

vernier.com/gdx-ph

#### Physical Science with Vernier

Physical Science with Vernier contains 40 ready-to-use experiments for physical science. Experiments are included for nine Vernier sensors and cover a variety of topics in chemistry and physics.

**HIGH SCHOOL** 

# Physics

From kinematics to optics, Vernier technology helps your students connect the dots between the classroom and the real world. Our physics products enable student and educator success so that you can spend less time troubleshooting and more time teaching your students about the scientific principles of the world around them.

vernier.com/physics

#### **Professional Development**

We are here to help. Our webinars, workshops, and personalized training options offer innovative ways to engage students with STEM in a traditional classroom or virtual environment.

vernier.com/training

#### Cart Fan

The Cart Fan is a modular fan you can add to the Dynamics Cart and Track System and Go Direct carts that provides a constant force for dynamics investigations. Using one or multiple fans on a single cart allows students to investigate constant acceleration, balanced/unbalanced forces, and variable thrust angles.

DTS-CFAN \$89

vernier.com/dts-cfan

#### Go Direct Force Plate

Measure the forces developed during stepping, jumping, and other human-scale actions. Observe change in apparent weight as you ride an elevator or measure reaction forces as you lean against a wall.

GDX-FP \$399

vernier.com/gdx-fp

#### Go Direct Motion Detector

Go Direct® Motion uses ultrasound to measure the position, velocity, and acceleration of moving objects.

GDX-MD \$129

vernier.com/gdx-md

# Go Direct Force and Acceleration

Measure forces as small as  $\pm 0.1~N$  and up to  $\pm 50~N$  with this sensor that couples a 3-axis accelerometer with a stable and accurate force sensor. Use it to measure pushes and pulls in the classroom or outdoors.

GDX-FOR \$119

vernier.com/gdx-for

#### Go Direct Photogate

This double-gate sensor includes two photogates built into the arms of the sensor. It accurately measures velocity and acceleration.

GDX-VPG \$105

vernier.com/gdx-vpg

#### Go Direct Acceleration

Collect acceleration, rotation, and altitude data in the classroom or in the field.

GDX-ACC \$115

vernier.com/gdx-acc

#### Go Direct Voltage

This sensor combines a wide input voltage range and high precision, making it an excellent choice for investigations of both AC/DC circuits and electromagnetism.

GDX-VOLT \$95

vernier.com/gdx-volt

#### Go Direct Current

Measure electric currents in circuits with this versatile sensor.

GDX-CUR \$99

vernier.com/gdx-cur

#### Go Direct 3-Axis Magnetic Field

Determine the magnitude and direction of a magnetic field at any point in space with this 3-axis sensor.

GDX-3MG \$99

vernier.com/gdx-3mg

#### Go Direct Sound

Use this sensor to easily capture and evaluate waveforms, or measure sound level in decibels.

GDX-SND \$99

vernier.com/gdx-snd

#### **Software**

#### Vernier Graphical Analysis Pro

Unlock key features with Vernier Graphical Analysis® Pro and do more with your Vernier sensors to deepen and extend learning. With access to Pro, you can enrich live instruction while providing more opportunities for students to interact with and analyze data outside of class time.

#### Physics Go Direct Standard Package

This package includes 12 products that work with Vernier Graphical Analysis Pro and LabQuest® 3.

- · Go Direct Motion
- · Go Direct Force and Acceleration
- · Go Direct Voltage
- · Go Direct Current (2)
- · Go Direct Photogate
- Go Direct Acceleration
- · Go Direct Sound
- · Go Direct Light and Color
- · Go Direct 3-Axis Magnetic Field
- · Ultra Pulley Attachment
- · Picket Fence

GDP-PHY-DX \$1,092

Buy 8 or more packages at \$1,071 and save \$168.

Learn more at vernier.com/gdp-phy-dx

#### Physics LabQuest 3 Standard Package

This package includes 13 products that work with Vernier Graphical Analysis Pro and LabQuest 3.

- · Vernier LabQuest 3 Interface
- · Motion Detector
- · Go Direct Force and Acceleration
- · Differential Voltage Probe
- · Current Probe (2)
- · Go Direct Photogate
- · Go Direct Acceleration
- · Go Direct Sound
- Light Sensor ☆
- · Go Direct 3-Axis Magnetic Field
- · Ultra Pulley Attachment
- Picket Fence

LQ3-PHY-DX **\$** \$1,291

Buy 8 or more packages at \$1,266 and save \$200.

Learn more at vernier.com/lg3-phy-dx

#### **Dynamics Cart and Track Systems**

#### One Dynamics System-Three Ways to Collect Data

Depending on your budget and your needs, we offer three ways to collect motion data.

#### Go Direct Sensor Cart

The wireless Go Direct® Sensor Cart includes an optical encoder on a wheel to sense the displacement of the cart, on or off the track. No interface is needed to use this system with the Vernier Graphical Analysis® Pro app. Students can perform impulse and momentum experiments with the built-in force sensor, and the 3-axis accelerometer means you can take your Sensor Cart off campus to investigate accelerations on a swing or merry-go-round.

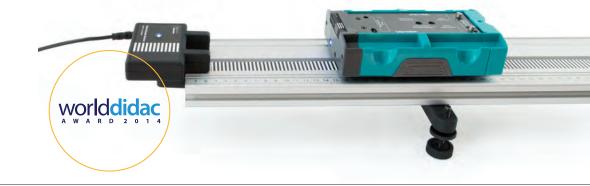

#### The Motion Encoder\*

VERNIER EXCLUSIVE

For classrooms already equipped with data-collection interfaces, the Motion Encoder dramatically improves data quality and simplifies experiment setup over the traditional ultrasonic Motion Detector. An optical sensor under the dynamics cart senses the passage of the cart over a striped decal on the track. The displacement information is sent as an encoded IR signal to a receiver at the track's end. This optical-only system provides excellent, repeatable, and noise-resistant data.

\* U.S. Patent No. 9,488,503

#### A Traditional Motion Detector

The Motion Detector is the classic method for collecting position data. Use a Motion Detector bracket to measure cart motion for the entire length of the track. You can even use two Motion Detectors at once to study cart collisions.

Unlike the Motion Encoder or Go Direct Sensor Cart, the Motion Detector can be used for dynamics experiments other than cart-on-track experiments. Students can graph their own walking motion, study a simple pendulum, or graph a ball toss with a Motion Detector. If you want to use only a Motion Detector for all of your motion experiments, get the Dynamics Cart and Track System without the Motion Encoder or Go Direct Sensor Cart.

#### **Dynamics Cart and Track System with Go Direct Sensor Cart**

BUILT-IN SENSORS = LOWER TOTAL COST

The Dynamics Cart and Track System with Go Direct Sensor Cart includes essential laboratory equipment for teaching dynamics and kinematics. With our Go Direct Sensor Cart, students can explore force, position, velocity, and acceleration directly on their device using Bluetooth® wireless technology. There are no wires to create drag, and no additional equipment is required! Each cart features built-in sensors that simplify experiment setup and make this system the best choice for studying dynamics and kinematics.

with 1.2 m Track DTS-GDX \$636 vernier.com/dts-gdx

with 2.2 m Track DTS-GDX-LONG \$748

vernier.com/dts-gdx-long

#### **Dynamics Cart and Track System with Motion Encoder**

THIS OPTION REQUIRES AN INTERFACE SUCH AS LABQUEST 3 OR LABQUEST MINI

The Dynamics Cart and Track System with Motion Encoder includes an optical position sensing system to record cart motion.

with 1.2 m Track DTS-EC \$540

with 2.2 m Track DTS-EC-LONG \$652 vernier.com/dts-ec-long

#### **Dynamics Cart and Track System**

USE WITH SENSORS YOU ALREADY OWN-SENSORS ARE NOT INCLUDED

The Dynamics Cart and Track System features the Combination Track/Optics Bench, two low-friction plastic carts (one standard and one with an adjustable plunger), and attachment accessories

with 1.2 m Track DTS \$360 vernier.com/dts

with 2.2 m Track DTS-LONG \$472 vernier.com/dts-long

The Cart Fan is a modular fan you can add to Dynamics Cart and Track Systems and Go Direct carts that provides a constant force for dynamics investigations. Using one or multiple fans on a single cart allows students to investigate constant acceleration, balanced/unbalanced forces, and variable thrust angles.

DTS-CFAN \$89

vernier.com/dts-cfan

#### **Friction Pad DTS**

Add a Friction Pad to any of our plastic dynamics carts to study the effect of consistent friction on the motion of the cart.

DTS-PAD \$32

vernier.com/dts-pad

#### Motion Encoder Cart and Receiver

This kit includes a fully assembled Motion Encoder Cart, as well as the Motion Encoder Receiver and Motion Encoder Long Track Strip.

DTS-MEC \$267

vernier.com/dts-mec

#### **Eddy Current Brake**

Eddy current brakes are used as a braking system for high-speed trains and roller coasters. Recreate this unusual braking system in your classroom or laboratory by installing our Eddy Current Brake into the end cap of a plastic Vernier dynamics cart. As the cart moves over the track, the magnets in the Eddy Current Brake create an electromagnetic drag on the cart that is proportional to the cart's speed.

DTS-ECB \$19

vernier.com/dts-ecb

#### **Bumper and Launcher Kit**

With the Bumper and Launcher Kit, students can use the Dynamics Cart and Track
System to perform Hooke's law experiments or study momentum and impulse.

The kit includes

- · Clay (~20 grams)
- · Clay holders (2)
- Dual-magnet bumper
- · Force sensor mounting screw
- Hoop bumpers (2)
- Magnetic bumpers (2)
- · Rubber bumpers (2)
- · Track bracket

BLK \$99

vernier.com/blk

Track and Force Sensor not included

#### 1D Motion and Force

#### Go Direct Motion

Go Direct® Motion uses ultrasound to measure the position, velocity, and acceleration of moving objects.

GDX-MD \$129

vernier.com/gdx-md

# Go Direct Photogate

This double-gate sensor includes two photogates built into the arms of the sensor. It accurately measures velocity and acceleration.

GDX-VPG \$105

vernier.com/gdx-vpg

#### Go Direct Sensor Carts

We've added wireless sensors to our popular dynamics cart. Each cart includes an encoder wheel to report position, velocity, and acceleration, plus a force sensor and a 3-axis accelerometer. Conduct basic physics investigations with or without a track.

Go Direct® Sensor Cart (Green)

#### Go Direct Projectile Launcher

Use the Go Direct® Projectile Launcher to investigate important concepts in two-dimensional kinematics. Launch steel balls at angles between 0 and 90 degrees and over distances up to 2.5 m.

GDX-PL \$499

vernier.com/gdx-pl

#### Independence of Motion Accessory

The Independence of Motion Accessory enables students to use the Vernier Projectile Launcher to perform the classic experiment where one ball is dropped as another is projected horizontally. The balls strike the floor simultaneously.

IOM-VPL \$59

vernier.com/iom-vpl

#### Time of Flight Pad

The Time of Flight Pad is used with a projectile launcher or photogate (not included) to precisely measure how long a projectile has been in motion.

TOF-VPL \$84

vernier.com/tof-vpl

#### Go Direct Rotary Motion Package

The Go Direct Rotary Motion Sensor and Rotational Motion Accessory Kit can be used to study rotational inertia, conservation of angular momentum, and additional rotational motion concepts.

GDX-RMPK ★ \$324

vernier.com/gdx-rmpk

#### **Go Direct Rotary Motion**

Measure angular displacement, angular velocity, and angular acceleration easily and precisely.

GDX-RMS ★ \$195

vernier.com/gdx-rms

#### **Rotational Motion Accessory Kit**

Use this kit with a rotary motion sensor to study the motion of a physical pendulum; the rotational inertia of disks, rings, and point masses; and the conservation of angular momentum.

AK-RMV \$129

vernier.com/ak-rmv

#### Go Direct Centripetal Force System

Easily measure angular velocity and centripetal force and acceleration without the hassle of wires using this system (includes a Go Direct Centripetal Force Apparatus and Go Direct Force and Acceleration).

GDX-CFAF \$444

vernier.com/gdx-cfaf

#### Ex

#### Moment of Inertia Kit

Go Direct Centripetal Force Apparatus

and Acceleration (not included).

This rotational system mounted on a solid base is designed to work with Go Direct Force

Expand the capabilities of a Vernier centripetal force apparatus to investigate moments of inertia of different geometries.

CFA-MIK \$219

GDX-CFA \$325

vernier.com/gdx-cfa

#### **Stainless Steel Temperature Probe**

Range: -40 to 135°C

TMP-BTA \$45

vernier.com/temperature-sensors

#### **Electrostatics Kit**

Students use the Electrostatics Kit to perform a range of experiments in electrostatics with Go Direct Static Charge.

ESK-CRG **☆** \$129

#### Gas Pressure Sensors

#### **Go Direct Gas Pressure**

Range: 0 to 400 kPa

#### **Gas Pressure Sensor**

Range: 0 to 210 kPa

GPS-BTA \$103

vernier.com/gas-pressure-sensors

#### **Waves and Sound**

#### Resonance Apparatus

The Resonance Apparatus is used for the classic experiment of determining the speed of sound using the principle of resonance in a tube that is closed at one end. Fill the apparatus with water and use a tuning fork or the included speaker to produce sound. Listen for the resonance while moving the inner tube, or use a sound sensor to locate the resonance lengths.

RES-APP \$199

vernier.com/res-app

#### Go Direct Sound

Use Go Direct® Sound to easily capture and evaluate waveforms.

GDX-SND \$99

vernier.com/gdx-snd

#### **Frequency Generator**

Easily connect the Frequency Generator to the Power Amplifier to create sine, square, sawtooth, and triangle waves at a wide range of frequencies. It also outputs DC voltage.

FGEN-PAMP \$189

vernier.com/fgen-pamp

#### Microphone

Display and study the waveforms of sounds from voices and musical instruments. This sensor is also appropriate for speed of sound experiments.

MCA-BTA \$55 vernier.com/mca-bta

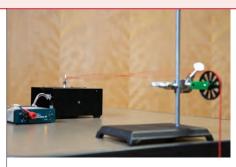

#### **Sound Level Sensor**

Use the Sound Level Sensor to easily measure sound level in decibels (dB) in a variety of experiments.

Range: 55 to 110 dB

SLS-BTA \$69 vernier.com/sls-bta

#### **Power Amplifier**

Drive devices such as speakers, lamps, and small DC motors.

PAMP \$249

vernier.com/pamp

#### Power Amplifier Accessory Speaker

Study mechanical waves on strings and springs.

PAAS-PAMP ★ \$155

vernier.com/paas-pamp

#### **Light and Optics**

#### Go Direct Light and Color

Measure light intensity in the visible to ultraviolet electromagnetic spectrum.

An RGB color sensor detects relative contributions of primary colors in light.

GDX-LC \$99

vernier.com/gdx-lc

#### **Light Sensor**

Investigate polarizers, reflectivity, and solar energy with this sensor that approximates the human eye in spectral response. It's great for inverse square law experiments.

LS-BTA **☆** \$69

vernier.com/ls-bta

#### **Diffraction Apparatus**

Using the Diffraction Apparatus, with its included Red Diffraction Laser, high-precision slits, and High Sensitivity Light Sensor, students can create, view, and measure diffraction and interference patterns.

The Diffraction Apparatus requires a Combination Track/Optics Bench (not included).

DAK \$669

vernier.com/dak

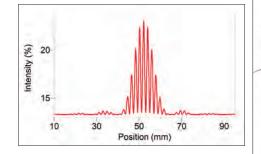

#### Combination 1.2 m Track/ Optics Bench

TRACK \$160 vernier.com/track

#### Green Diffraction Laser (optional)

Add this to your Diffraction Apparatus to study the effect of wavelength on a diffraction pattern.

GDL-DAK \$250 vernier.com/gdl-dak

#### **Optics Expansion Kit**

Use the Optics Expansion Kit with your dynamics track (not included) to conduct optics experiments, such as image formation with lenses and light intensity vs. distance. You can even use the kit to build a basic telescope.

#### Kit includes

- 3 lenses (100 mm converging lens, 200 mm converging lens, -150 mm diverging lens)
- Screen
- Combination luminous and point light source
- · Light Sensor Holder\*
- · Aperture screen
- Power supply

The Optics Expansion Kit is used in Physics with Vernier and Advanced Physics with Vernier—Beyond Mechanics experiments.

0EK \$199

#### Download free sample experiments at vernier.com/oek

\* The Light Sensor Holder can be used with any style Vernier light sensor.

#### Combination Dynamics Track and Optical Bench

The Combination Dynamics Track and Optical Bench is aluminum and includes a metric scale. Extremely rigid, this 1.2 (or 2.2) meter track will not sag under use. The track includes two Adjustable Two Foot Levelers.

1.2 m Track TRACK \$160

vernier.com/track

2.2 m Track TRACK-LONG \$272

#### Polarizer/Analyzer Set

PAK-0EK \$89

vernier.com/pak-oek

#### Mirror Set

M-0EK \$69

vernier.com/m-oek

Light source not included

#### **Color Mixer**

CM-0EK \$189

Download a free sample experiment at vernier.com/cm-oek

See website for replacement parts.

#### **Modern Physics**

# Go Direct Emissions Spectrometer

This emissions spectrometer connects to your device via Bluetooth® wireless technology or USB to give precise measurements over a range of 350–900 nm. Use it with or without an optical fiber (not included) to examine spectra of light bulbs, spectrum tubes, or the sun.

GDX-SPEC-EM \$950

vernier.com/gdx-spec-em

#### **Vernier Emissions Fiber**

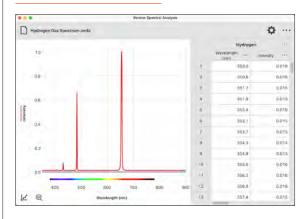

VSP-EM-FIBER \$94 vernier.com/vsp-em-fiber

#### Vernier Spectral Analysis App

Our free Vernier Spectral Analysis® app makes it easy to incorporate spectroscopy into your physics lab. Using the app, students can analyze spectra from diverse sources such as spectrum tubes, light bulbs, and the sun.

#### vernier.com/spectral-analysis

# Spectrum Tube Single Power Supply

These power supplies feature an ultra-safe design for electrifying spectrum tubes.

ST-SPS **☆** \$299

#### **Spectrum Tubes**

Spectrum Tubes are permanently enclosed in protective plastic carriers, with no exposed high voltage.

All Spectrum Tubes are sold separately:

Hydrogen	ST-H☆	\$49	
Nitrogen	ST-N ☆	\$49	
Helium	ST-HE <b>☆</b>	\$49	
Neon	ST-NE ☆	\$49	
Carbon Dioxide	ST-C02 <b>☆</b>	\$49	
Air	ST-AIR☆	\$49	<b>*</b>
Argon	ST-AR <b>☆</b>	\$49	

vernier.com/spectrum-tubes

Spectrum Tubes carry a two-year warranty (hydrogen tube: two years or 40 hours, whichever comes first; all other tubes: two years or 100 hours, whichever comes first).

#### **Radiation Monitors**

#### **Go Direct Radiation Monitor**

Explore radiation statistics, measure the rate of nuclear decay, and monitor radon progeny. Go Direct® Radiation Monitor detects alpha, beta, gamma, and X-ray radiation, and includes LED and audible indicators.

GDX-RAD \$219

vernier.com/gdx-rad

#### **Vernier Radiation Monitor**

The Vernier Radiation Monitor detects alpha, beta, gamma, and X-ray radiation and can be used for experiments in nuclear counting statistics, shielding, and decay rate measurements.

VRM-BTD \$199

vernier.com/vrm-btd

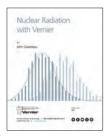

#### **Nuclear Radiation with Vernier**

This free e-book includes six experiments for data collection with a radiation monitor:

- · Distance and Radiation
- · Counting Statistics
- · Lifetime Measurement
- Background Radiation Sources
- · Radiation Shielding
- · Alpha, Beta, and Gamma

**HIGH SCHOOL** 

# Engineering and Coding

Encourage curiosity, build confidence, and spark an interest in STEM careers in your students. Vernier solutions give your students practical ways to learn engineering design principles and integrate sensor data into computer science concepts.

vernier.com/engineering

#### Professional Development

We are here to help. Our webinars, workshops, and personalized training options offer innovative ways to engage students with STEM in a traditional classroom or virtual environment.

vernier.com/training

# PLTW Engineering and Computer Science

Project Lead The Way (PLTW) empowers students to develop in-demand, transportable knowledge and skills through programs in computer science, engineering, and biomedical science.

vernier.com/pltw

#### Go Direct Structures & Materials Tester

Use our Go Direct® Structures & Materials Tester to evaluate the strength of model bridges and engineered structures by measuring the applied load. Utilizing both load and displacement sensors, your students can evaluate the properties of materials.

#### **Benefits**

- Force and displacement sensors connect via Bluetooth® wireless technology or USB
- Uses Vernier Graphical Analysis® Pro app to collect and analyze data
- Exact force and displacement for bends and breaks
- Accurate positioning for center and off-center loading
- Free software simplifies bridge-building contests
- Includes Materials Testing: Beams to Bridges e-book

GDX-VSMT \$1.199

vernier.com/gdx-vsmt

#### **Truss Tester Accessory**

The Truss Tester Accessory attaches to the Go Direct Structures & Materials Tester, holds a single truss upright, and makes it possible for the load to be applied in a variety of locations.

VSMT-TRUSS \$149

vernier.com/vsmt-truss

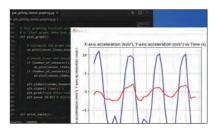

#### **Go Direct Bridge Competition Software**

Make data collection easy and seamless for bridge-building competitions with our free Go Direct Bridge Competition Software. This software provides real-time graphing to give students immediate feedback on bridge performance and displays side-by-side comparisons for the entire class.

FREE DOWNLOAD

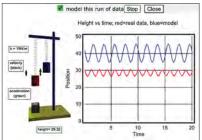

vernier.com/godirect-bridge-competition-software

# Code with Python

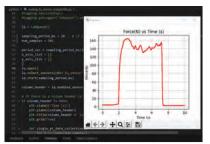

#### Python with Go Direct Sensors Create Python® code to centure data

Create Python® code to capture data from Go Direct sensors. Supported on Windows® 10, macOS,® and Linux (including Raspberry Pi®)

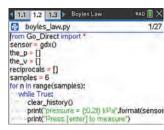

#### Web VPython with Go Direct Sensors

Create 3D animations in a browser with Web VPython and Go Direct sensors. Both are compatible with a Chrome $^{\text{\tiny TM}}$  browser on Windows, macOS, and Chromebooks.

#### Python with LabQuest Sensors

Communicate with your LabQuest® sensors in Python. For LabQuest and Python, we offer support for Windows and macOS.

#### Python with TI Calculators and Go Direct Sensors

Students can code beyond the screen of select TI calculators by integrating live sensor data into their Python programming language activities.

Available resources for using Python with Vernier sensors include a GitHub® repository, an introductory guide, and sample programs and activities.

vernier.com/python

For other coding solutions, including Scratch, JavaScript, and LabVIEW,™ see vernier.com/hs-engineering

#### Code with Arduino

Combining Vernier sensors with the inexpensive, easy-to-program Arduino® microcontrollers makes integrating coding and engineering into your curriculum simple and affordable.

vernier.com/arduino

# Math

Confidence in math grows when students grasp its connection to everyday life. And now with enhanced compatibility between Vernier and Texas Instruments, students can explore math in tangible, real-world scenarios by wirelessly capturing and analyzing data on their TI calculators in real time.

vernier.com/math

#### Wirelessly Collect and Analyze Data on TI Calculators with Vernier Go Direct Sensors

Unlock the doors to a deeper understanding of math and science through real-time data collection and analysis. Using the Vernier DataQuest® app on the TI-Nspire™ CX II and TI-Nspire CX II CAS calculators, students can predict, collect, and analyze data from select Go Direct sensors.

Connect any compatible Go Direct® sensor wirelessly using the TI Bluetooth® Adapter or directly through USB.

TI Bluetooth Adapter TI-CALC-BTADPT \$23 \*Includes cable; TI calculators sold separately

TI Calculator Data-Only Go Direct Sensor Cable CB-GDX-TICALC \$9

\*TI calculators sold separately

Seamlessly connect your TI calculator to supported Go Direct sensors using the Vernier DataQuest App and the TI Bluetooth Adapter.

This data-only sensor cable is specially designed to transmit data from supported Go Direct Sensors without depleting the calculator's battery.

Go Direct Temperature GDX-TMP \$79

Go Direct pH GDX-PH \$109

Go Direct Gas Pressure GDX-GP \$105

Go Direct Light and Color GDX-LC \$99

Go Direct Force and Acceleration GDX-FOR \$119

Go Direct Motion GDX-MD \$129

#### **TI-Nspire Go Direct Package**

Add hands-on exploration using Go Direct sensors to your TI-Nspire CX II and TI-Nspire CX II CAS handhelds with this convenient package. (TI-Nspire calculators sold separately.)

- · Go Direct Force and Acceleration
- · Go Direct Gas Pressure
- Go Direct Light and Color
- · Go Direct Motion
- · Go Direct pH

- · Go Direct Temperature
- · Data-Only Go Direct Sensor Cable
- · TI Bluetooth Adapter

GDP-TICALC \$672 vernier.com/gdp-ticalc

#### Python Programming with TI and Vernier

Empower students to code their own data-collection programs with Python®! By downloading and transferring Python modules for Go Direct sensors to their TI graphing calculators, students can easily experiment with input and output controls using their collected data.

TI-Nspire CX II (TI-NSCX2)	TI-84 Plus CE Python (TI-84PCE)
Supports 6 Go Direct sensors	Supports 6 Go Direct sensors
Connects with 1 Go Direct sensor at a time	Connects with 1 Go Direct sensor at a time
Uses up to 4 sensor channels at a time (for sensors that have multiple sensor channels)	Uses 1 sensor channel at a time (for sensors that have multiple sensor channels)
Requires TI-Bluetooth Adapter	Requires TI-Bluetooth Adapter

Learn more about the TI Go Direct Python Module at www.education.ti.com/go-direct

## More Options to Collect Data with TI Calculators

Connect a Vernier sensor directly to any TI-Nspire handheld or TI-84 Plus graphing calculator and start collecting data. Collect data with the CBR 2 motion detector or EasyTemp® temperature probe, or use EasyLink® with a supported sensor to explore math and science concepts found in real-world phenomena such as light, pressure, force, and more.

# Middle School

Hands-on learning with technology is ideal for middle school students. Enhance their discovery and understanding of the world around them with the use of Vernier technology. Using our versatile, cutting-edge products and ready-to-go experiments correlated to the NGSS, you can encourage your students' curiosity and prepare them for high school—and the world beyond.

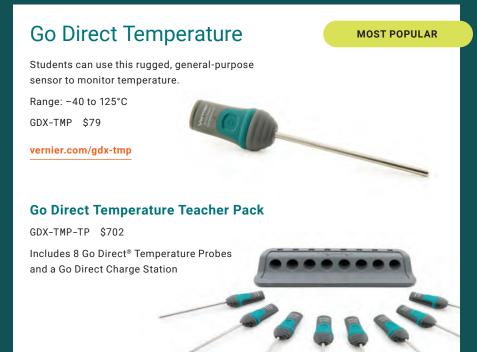

vernier.com/middle-school

#### **Professional Development**

We are here to help. Our webinars, workshops, and personalized training options offer innovative ways to engage students with STEM in a traditional classroom or virtual environment.

vernier.com/training

# Go Direct Force and Acceleration

Measure forces as small as  $\pm 0.1$  N and up to  $\pm 50$  N with this sensor that couples a 3-axis accelerometer with a stable and accurate force sensor. Use it to measure pushes and pulls in the classroom or outdoors.

GDX-FOR \$119

vernier.com/qdx-for

#### **Go Direct Motion**

Go Direct Motion uses ultrasound to measure the position, velocity, and acceleration of moving objects.

GDX-MD \$129

vernier.com/gdx-md

#### Go Direct 3-Axis Magnetic Field

Determine the magnitude and direction of a magnetic field at any point in space with this 3-axis sensor.

GDX-3MG \$99

vernier.com/gdx-3mg

#### Go Direct Gas Pressure

Go Direct Gas Pressure measures the absolute pressure of a gas.

GDX-GP \$105

vernier.com/gdx-gp

#### Go Direct pH

Go Direct pH is a general-purpose pH sensor used to monitor pH of aqueous solutions.

GDX-PH \$109

vernier.com/gdx-ph

#### Go Direct Light and Color

Go Direct Light and Color combines the power of multiple sensors to measure light intensity in the visible range and UV portions of the electromagnetic spectrum.

GDX-LC \$99

vernier.com/gdx-lc

#### Go Direct Voltage

Go Direct Voltage combines a wide input voltage range and high precision, making it an excellent choice for investigations of both AC/DC circuits and electromagnetism.

GDX-VOLT \$95

vernier.com/gdx-volt

#### Wind Energy **Explorations**

Students gain an understanding of energy, circuits, and loads, as well as practice

engineering design as they use this lab book to explore wind energy.

Wind Energy **Explorations EXPERIMENTS**

#### **OpenSciEd**

Vernier knows that science education is not static. Your students need to understand critical scientific concepts, use these concepts to solve problems, and understand how they connect to the real world. These objectives are incorporated into the main pillars of the three-dimensional learning framework developed by the National Research Council.

We are proud to partner with OpenSciEd,® a provider of high-quality, open-source science instructional materials. Our partnership gives you access to free field-tested and EQuIP-approved units that support the three-dimensional learning approach. Vernier provides free downloadable supplements that integrate data-collection technology into these units. When Vernier technology is paired with OpenSciEd's classroom-tested curriculum, your students establish a deep understanding of critical scientific concepts through data collection.

Learn more at vernier.com/openscied

#### Exploring Life Science

From yeast to humans, this e-book provides opportunities for students to learn about life science.

Learn more at vernier.com/msb-ls-e

**Download only** MSB-LS-E \$13

#### **Exploring Life Science Go Direct Package**

This package contains the following: Go Direct Gas Pressure, Go Wireless® Heart Rate, Go Direct Conductivity, and Gas Pressure Sensor Bulb.

GDP-MS-LS \$340

Buy 8 or more at \$334 and save \$48.

#### Middle School Explorations: Chemical Reactions

In the six experiments in this book, students gain an understanding of various types of chemical reactions as they build a model to explain what goes on at the molecular level during a chemical reaction.

# Elementary Science with Vernier

This collection of experiments for elementary students includes the topics of temperature, motion, force, magnetism, light, electricity, and gas pressure.

#### Includes Experiments from These E-books

- · Investigating Temperature
- · Investigating Gas Pressure
- Investigating Motion
- · Investigating Force
- · Investigating Light
- · Investigating Magnetism
- · Investigating Voltage

Printed book + download EWV \$59

Download only EWV-E \$45

#### **Investigating Wind Energy**

Printed book + download

ELB-WIND \$27

Download only

ELB-WIND-E \$24

With the *Investigating Wind Energy* lab book, students conduct investigations to learn about energy transfer, basic electric circuits, and blade design.

#### **Investigating Wind Energy Package**

Contains the following products

- · Go Direct Energy
- · Vernier Resistor Board
- KidWind MINI Wind Turbine with Blade Design

GDP-EL-WE \$187

Buy 8 or more at \$184 and save \$24.

vernier.com/gdp-el-we

#### Investigating Solar Energy

Printed book + download ELB-SOLAR \$27

Download only
ELB-SOLAR-E \$24

The *Investigating Solar Energy* lab book draws on solar energy as a real-world example through which to investigate energy transfer, series and parallel circuits, and other factors that affect solar panel output.

#### **Investigating Solar Energy Package**

Contains the following products

- · Go Direct Energy
- · Go Direct Surface Temperature
- · Solar Energy Exploration Kit
- · Vernier Resistor Board

GDP-EL-SE \$306

Buy 8 or more at \$300 and save \$48.

# Sensors & Accessories

#### The Vernier Sensor Advantage

#### **Outstanding Performance**

With over 40 years of experience developing technology for education, we design our sensors for active, hands-on experiments. Vernier sensors are rugged, classroom-proven technology that are well supported and easy to use. The sensors provide consistent, high-quality results for the demands of the classroom.

#### **Connect & Collect**

Simply connect, and you're ready to collect. All Vernier sensors on the following pages are automatically detected and set up for data collection when used with Vernier software.

#### **Go Direct Sensors**

Our Go Direct® sensors connect directly to a computer, Chromebook,™ or mobile device via Bluetooth® wireless technology or USB connection. Most sensors include a rechargeable battery to power the sensor when used wirelessly.

#### **LabQuest Sensors**

Our LabQuest® sensors require an interface from the LabQuest family, such as LabQuest 3 or LabQuest Mini. The interface sends information from the sensor to the data-collection and analysis software on a device such as a computer, Chromebook, or mobile device.

For more information on sensor compatibility, visit vernier.com/sensors

#### **Generous Warranty**

Buy with confidence. Most Vernier sensors are covered by a 5-year limited warranty. During the warranty period, Vernier will repair or replace the item if there is a defect in materials or workmanship. Outside the warranty, Vernier will attempt to repair most products, often at no charge.

#### Satisfaction Guarantee

Vernier has been selling science education software and data-collection hardware since 1981. We pride ourselves on the quality and affordability of our products and our service to our customers. If at any time you are unhappy with any of our products or service, please get in touch.

#### **Vernier Science Education**

13979 SW Millikan Way Beaverton, OR 97005-2886 vernier.com · info@vernier.com Toll Free: 888-VERNIER (888-837-6437)

Fax: 503-277-2440

#### **Product Usage**

Vernier products are designed for educational use. Our products are not designed nor are they recommended for any industrial, medical, or commercial process, such as life support, patient diagnosis, control of a manufacturing process, or industrial testing of any kind. We design our products with the specifications and features that educators and students need to be successful. In our effort to keep our products affordable and easy to use, we may not meet the specifications or include the features that an industrial scientist or medical professional might want.

## **Equipment Return**

Any product that does not meet your needs may be returned within 30 days for a full refund. Equipment returned after 30 days may be subject to a restocking fee.

A Return Merchandise Authorization, available from Vernier, is required for any product return. Equipment returned for exchange or credit must be in new condition and in its original packaging.

## **Prices and Shipping**

Prices displayed on our website at the time of purchase supersede all previously published prices. Prices are in US dollars and are FOB shipping point. Shipping charges may vary, depending on method of shipment. Increased shipping charges for heavier or bulkier items may apply due to weight or dimensions. Applicable sales tax may be charged. Prices are for US educational institutions only and are subject to change without notice

#### International Sales

All Vernier orders for use outside of the US and Canada are handled by our worldwide network of Vernier dealers. Contact us for more information.

Sales of Vernier products in Canada are handled by

#### Vernier Canada

7030 Woodbine Ave. Suite 500 Markham, Ontario L3R 6G2 Canada verniercanada.ca · info@verniercanada.ca Phone: (800) 376-4210 · Local: (705) 915-3656

#### **Preview Policy**

Most Vernier products are available for a 30-day preview (or longer, if requested) to US educational institutions.

#### Warranties

Most Vernier-branded products carry a 5-year limited warranty. Product-specific details can be found under the Support tab on each product's web page. During the warranty period, Vernier will repair or replace the item if there is a defect in materials or workmanship. Outside the warranty, Vernier will attempt to repair most products. The Vernier warranty covers products when used by educational institutions only. Products manufactured by anyone other than Vernier are subject to the conditions of the warranty supplied by the manufacturer.

Additional exclusions and limitations can be found at vernier.com/warranty

## **Privacy Policy**

Vernier Science Education does not sell, lease, or loan our mailing list or portions thereof to anyone at any time. We do not store credit card information on our online store or in our accounting system. For more information on our privacy policy, see vernier.com/legal

If you wish to be removed from our mailing list, simply write to us at updates@vernier.com, and we will remove you immediately.

#### Software Licenses

Vernier Graphical Analysis, Vernier Spectral Analysis, and Vernier Instrumental Analysis are available as free downloads from our website. distributed as a progressive web app, or distributed through the appropriate web store. Vernier Graphical Analysis Pro is available as a subscription service. Vernier Video Analysis is available as a subscription service and is distributed as a progressive web app. Apps for iOS, iPadOS, Android, and ChromeOS are distributed through their respective stores. Terms and licensing are thus determined entirely by these stores.

#### Other Software

Software from other companies, such as Texas Instruments, is licensed under separate agreements by their respective companies.

#### **Trademarks**

Vernier Science Education, LabQuest, SpectroVis, Vernier and caliper design, Go Direct, Go Wireless, Go!, Go! Link, Go!Temp, Go! Motion, LabQuest Viewer, Vernier Spectral Analysis, Vernier Video Analysis, Vernier Instrumental Analysis, Vernier EasyLink, Vernier EasyTemp, Vernier Graphical Analysis, Vernier Connections, and Vernier STEM Classroom are our registered trademarks. Vernier.com, BlueView, and Video Physics are our trademarks or trade dress.

Apple, the Apple logo, iPhone, iPad, iPadOS, and macOS are trademarks of Apple Inc., registered in the United States and other countries. App Store is a service mark of Apple Inc.

Arduino® and are trademarks of Arduino SA

CBR 2, TI Navigator, SmartView, and TI-Nspire are trademarks of Texas Instruments. National Instruments, NI, and LabVIEW are trademarks or trade names of National Instruments Corporation.

Raspberry Pi is a trademark of Raspberry Pi Trading.

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Vernier Science Education is under license.

All other marks not owned by us that appear herein are the property of their respective owners, who may or may not be affiliated with, connected to, or sponsored by us

#### **Technical Support**

We are readily available to help you with individual questions about our software and hardware-simply email support@vernier.com. chat with us live on vernier.com, or call us at our toll-free number: 888-VERNIER (888-837-6437).

Our email newsletter makes it easy to access new ideas, learn about new products, and get inspired by fellow educators. Sign up at vernier.com/newsletter

#### Legal

Visit our Legal Center at vernier.com/legal to find our privacy statements, terms of use, and other information about our products and services.

# Welcome to the Vernier STEM Classroom

Everything we do for high school science educators and their students

can be found in the Vernier STEM Classroom.

The Vernier STEM Classroom® is an integrated approach to using the full catalog of Vernier hardware, software, content, assessment, professional development, and technical support to make a high-quality STEM education possible for all high school students. Enhancing the Vernier STEM Classroom is **Vernier Connections**,® (see page 4–5) a powerful web-based platform that combines our data-collection tools, lessons and experiments, and formative assessment to support educators in engaging all students with hands-on, culturally relevant science education.

# What is the Vernier STEM Classroom®?

#### Hardware

Designed for education and built to last, Vernier hardware is durable, dependable, and affordable. Our comprehensive catalog of science education hardware includes sensors, probes, interfaces, and lab equipment—all of which are designed to help students engage with key STEM concepts.

#### Software

Our award-winning, easy-to-use software brings data collection, visualization, and analysis to students' fingertips. In the process, it helps boost engagement, increases understanding of complex STEM concepts, and brings science to life.

#### Content

Vernier offers hundreds of educator-tested, ready-to-use experiments and investigations that support implementation of Vernier technology. With Vernier Connections, we are building new investigations and enhancing existing Vernier experiments to support three-dimensional learning.

#### Assessment

Formative assessments in the Connections platform provides valuable information to help educators monitor student learning and target lessons to meet the needs of every student to help them succeed.

# Professional Development

When it comes to professional development for science educators, we offer a variety of in-person and online options.

From subject-specific webinars to personalized training with our science education experts, we help educators address their unique challenges and equip them with skills and resources to ensure success.

#### **Technical Support**

Our priority is to provide STEM educators with unparalleled customer service, technical support, and resources so they are always supported when integrating our technology. Our renowned technical support team includes former educators who draw from their classroom experience to answer educators' questions and find solutions.
